DEMANDANTE:	CARMEN ALICIA RODRÍGUEZ Y OTROS
DEMANDADO:	CENTRALES ELÉCTRICAS DE NORTE DE SANTANDER

MAGISTRADA SUSTANCIADORA:
DR. NIDIAM BÉLEN QUINTERO GELVES

En término oportuno dentro del proceso ordinario seguido por CARMEN ALICIA RODRÍGUEZ Y OTROS contra CENTRALES ELÉCTRICAS DE NORTE DE SANTANDER S.A. E.S.P., el apoderado judicial de la parte demandante interpuso recurso extraordinario de casación contra la sentencia proferida por esta Sala en el proceso de la referencia.

La Ley Procesal Laboral establece que la cuantía para la viabilidad del recurso de casación, debe ser superior a los ciento veinte salarios mínimos legales mensuales vigentes, que para el año 2021 equivalía a \$908.526 y por ende el interés para casación asciende a \$ 109.023.120.

A su vez la H. Corte Suprema de Justicia ha reiterado que el valor del interés para recurrir en casación de la parte demandante, si el juez colegiado confirma íntegramente la absolución dispuesta por el A quo, no será otro que el valor de las peticiones impetradas en el escrito inaugural del proceso y que a la postre, desde luego, les fueron negadas con la sentencia recurrida.

En este caso, lo pretendido principalmente por el actor era que se reliquidara la pensión de jubilación reconocida por la demandada a partir de la indexación de su primera mesada, se ordene el pago de las diferencias a que haya lugar desde la fecha de reconocimiento y se ordene el pago de intereses moratorios.

Al resolver las decisiones de instancia, se resolvió que siguiendo la fórmula e indicaciones ordinarias de la indexación de primera mesada no había lugar a reajuste alguno; sin embargo, en el curso del proceso el apoderado de los actores alegó que el cálculo demandado era diferente y para ejemplificar aportó una serie de liquidaciones para estimar el valor que estima debía reajustarse, de la siguiente manera:
